DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 3-6, drawn to a trailer, classified in class 414, subclass 517.
- II. Claims 7-9, drawn to a raw material delivery and waste removal system, classified in class 414, subclass 809.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it deals with a system of delivering raw materials and collecting waste at a permanent structure requiring two separate bays and a generic transport container for the raw materials and refuse.

The subcombination has separate utility such as a self loading and unloading delivery trailer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3652

A telephone call was made to Raymond Galasso on October 29, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Response to Amendment

The amendments to the claims filed on September 26, 2002 have been entered into the record.
